

Los Alamos National Security invests in Santa Fe Community College Foundation

July 16, 2009

College plans Sustainable Technology Center

Los Alamos, New Mexico, July 16, 2009—Representatives from Los Alamos National Security, LLC and Los Alamos National Laboratory today are presenting a check for \$100,000 to the Santa Fe Community College and its GROW Foundation for the college's planned Sustainable Technologies Center.

The new center is an educational and training facility for alternative energy and green jobs that will integrate 21st century trades with advanced technologies and "green" curricula to promote a sustained economy.

LANS, which manages and operates Los Alamos National Laboratory for the National Nuclear Security Administration, signed the institutional agreement with the college and the GROW Foundation to help further develop and expand the renewable energy industry cluster in the Santa Fe region. The funds will be used by the Sustainable Technologies Center to help cover faculty salaries and fund program development. The Sustainable Technologies Center is part of the Trades and Advanced Technology Technologies Center, a 36,000-square-foot structure scheduled for completion by fall 2010. Groundbreaking on the entire facility is scheduled for August 14.

"Los Alamos National Security is eager to help more New Mexicans obtain training and find careers in advanced technologies professions," said LANS Executive Staff Director Jerry Ethridge.

"We see SFCC as a leader in providing programs that have a positive impact on New Mexico's economy and its workforce, and we are proud to support the growth of its Sustainable Technologies Center."

According to Kurt Steinhaus of the Laboratory's Community Programs Office, the agreement between LANS, GROW, and SFCC also will help the Laboratory meet future workforce needs by providing a college environment that encourages students to pursue careers, possibly at the Laboratory, in advanced technology fields.

The GROW Foundation provides Santa Fe Community College financial support and assistance for new program development and support, endowed faculty chairs, capital campaigns, and student scholarships
